

EngrTEAMS

February 15, 2018

EngrTEAMS

South Washington County Schools was one of several partners in this 5 year, \$8 million grant. The lead partner was the University of Minnesota Stem Center.

This grant provided many teachers professional development and support for teaching engineering.

South Washington County Schools: Igniting a passion for lifelong learning!

Teachers Involved

- 15+ district teachers in grades 4-8.
- Many teachers working several summers from 2-5 years.
- Teachers participated in high quality professional development and earned a stipend for their involvement and for their development of curriculum units.
